## Introduction to Ideathon

---

The **Ideathon** is an **aerospace-related** competition for European students organized by **EUROAVIA**. In this competition, the participating teams are tasked with designing solutions following the **challenges** related to this year's theme of **sustainability** which are proposed by the companies sponsoring the event.

The key purposes of organising this event are to encourage students to face complex challenges, develop **a deeper understanding** of industry-relevant problems, and take a step forward in becoming professional **problem-solvers**. Companies can showcase their efforts in their sector by presenting relevant challenges addressed with **innovative solutions** from student teams.

# THE EVENT

## Stages

The competition will be held in **Europe** and divided into two phases:

**First Stage: 26–31 October 2024 in Toulouse, France**

**Second Stage: 1–6 December 2024 in Zagreb, Croatia**

During the first phase, each participating team of **3–4 team members** will select one of the company-proposed challenges. The winning teams of each challenge will **qualify for the final**.

20:00 - 21:00						
21:00 - 22:00		-	-	-	-	
22:00 - ON						

# OVERVIEW OF PREVIOUS EDITIONS

The previous edition of the Ideathon was held last year and consisted of two phases, with the first phase taking place in **Terrassa, Spain**, and the second in **Munich, Germany**. During the first round, five teams looked for solutions to the challenges proposed by our sponsoring companies, **Ansys** and **GTD**.

Two of those teams advanced to the final round and traveled to Munich to compete again. The team that won the first edition was **UniBoss** from **Forlì-Bologna, Italy**, excelling with their quick problem-solving and creative ideas, even surpassing the expectation of Ansys who sponsored the challenge.
